

Country sized by Region

Region (Count dist...)

1 4

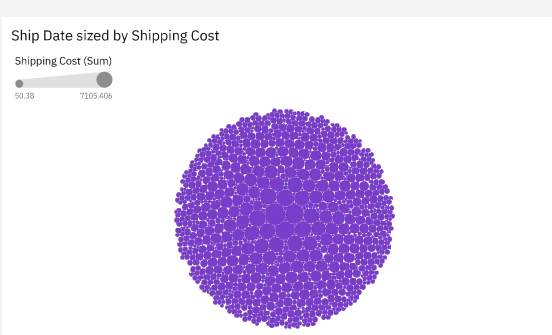

This treemap visualizes countries categorized by region. The size of each country's area represents its count distribution. The 'United States' is the largest and most prominent label, oriented vertically. Other visible labels include 'Mongolia', 'Austria', and various European countries like 'Germany', 'France', and 'Italy'.

Ship Date sized by Shipping Cost

Shipping Cost (Sum)

50.38 7105.406

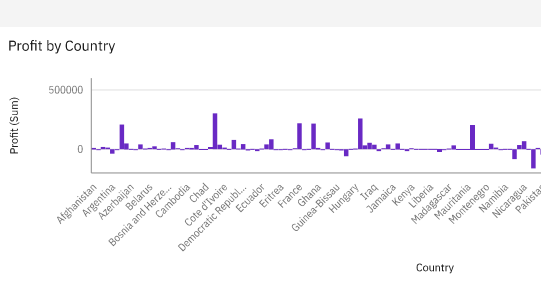

This treemap visualizes ship dates categorized by shipping cost. The size of each ship date's area represents its sum of shipping costs. The visualization is a dense, circular cluster of many small, purple-colored shapes, indicating a high frequency of data points.

Profit by Country

Profit (Sum)

500000

0

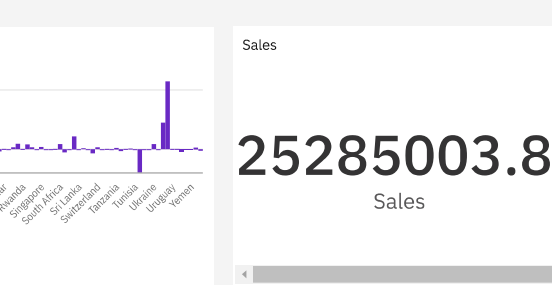

This bar chart displays the profit for various countries. The y-axis represents profit in millions, ranging from 0 to 500,000. The x-axis lists countries including Afghanistan, Algeria, Argentina, Australia, Austria, Belgium, Benin, Bolivia, Bosnia and Herzegovina, Cambodia, Chad, China, Colombia, Costa Rica, Czechia, Denmark, Ecuador, Egypt, El Salvador, France, Germany, Greece, Guatemala, Guinea-Bissau, Hungary, India, Indonesia, Iran, Jamaica, Kenya, Liberia, Lithuania, Luxembourg, Malaysia, Maldives, Mali, Mauritania, Mexico, Mongolia, Myanmar, Namibia, Nicaragua, Niger, Nigeria, Pakistan, Peru, Philippines, Poland, Portugal, Rwanda, Saudi Arabia, Singapore, South Africa, Sri Lanka, Switzerland, Taiwan, Tanzania, Thailand, Tunisia, Turkey, Ukraine, Uruguay, and Yemen. The bars are purple, and the chart shows significant profit for several countries, with a notable peak for Yemen.

Sales

25285003.82

Sales

This section displays a large sales figure of 25,285,003.82. Below the figure is a slider control with a blue bar and a white handle, indicating a range or selection. The slider is positioned at the far left, suggesting the displayed value is the minimum or a low point in the range.
